

AT THE FOREFRONT
**UChicago
Medicine**

Department of Psychiatry & Behavioral Neuroscience

Child and Adolescent Psychiatry Training Program

“Our mission is to train fellows to become excellent clinicians, re-searchers, and teachers, and to foster an attitude of innovation and leadership as the basis for pioneering tomorrow’s state-of-the-art treatment. The Department is mindful of the fact that realizing one’s full potential is closely tied to personal growth, and strives to develop close supervisory relationships and process groups with our fellows to support them in reaching their professional training goals”

- Karam Radwan, MD, Program Director
