Department of Psychiatry & Behavioral Neuroscience

Psychiatry Training Program

"The defining mission of our residency training program is to prepare our graduates to be competent, well-informed, caring clinicians and scientists who are prepared to manage any challenge in psychiatry by utilizing the latest scientific information and by critically applying sound reasoning skills. We prepare our graduates to be dedicated to their patients, colleagues and to their own continued learning. We emphasize intellectual discourse, interdisciplinary work, and collaborative education."

The University of Chicago is often known as the teacher of teachers. Education is of central importance in our Department: we are all teachers and students at the same time, for it is through teaching that we learn best. While not all residents go on to careers in academia or research, all residents are prepared for a lifetime of learning and teaching by being able critically to assess new information and add it to their knowledge base and skill sets. With the rapid development of knowledge in psychiatry and the neurosciences, this ability is perhaps the most important one a training program can offer its residents."

- Deborah Spitz, MD

Vice Chair for Education and Academic Affairs, Residency Training Director

Didactics

PGY1: Thursday PM

PGY2: Tuesday PM

**PGY3: Tuesday AM
Thursday PM**

PGY4: Thursday PM

Offices

PGY1, 2 & 4 : Share a group office

PGY3: All have individual offices

Call Frequency

PGY1-2: Three calls per month
(on average) with graded
responsibilities and
independence.

PGY3-4: In house moonlighting
available including PGY1
backup call

Stipend (2025-2026)

PGY1 - \$75,205

PGY2 - \$79,551

PGY3 - \$82,295

PGY4 - \$86,036

Time Off

Vacation: 20 days (paid)

Sick Leave: 5 days (paid)

Medical Leave: Up to 4 weeks (paid)
runs concurrent with FMLA

Education Days: Time off to attend
conferences and meetings is
permitted with approval from
the Program Director

Training Directors

Deborah Spitz, M.D., Psychiatry Residency Training Director

A Board Certified adult psychiatrist, she received her MD from the University of Pennsylvania and completed her psychiatric residency and fellowship at the University of Chicago. She was the recipient of an NIMH Junior Faculty Development Award in 1982, and served on the faculty at The University of Chicago until 1988. For the next 12 years, she was on the faculty at Tufts-New England Medical Center, where she directed the adult residency training program, before relocating to the United Kingdom. After spending three years practicing in the NHS in Britain, Dr. Spitz re-joined the faculty at the University of Chicago in 2003. Throughout her career Dr. Spitz has received numerous teaching awards, has been the President of the Association for Academic Psychiatry, and has been active in the American Psychiatric Association and the Association for the Advancement of Philosophy and Psychiatry.

Zehra Aftab, M.D., Associate Psychiatry Residency Training Director

A Board Certified adult psychiatrist, she received her MD from the University of Buffalo and completed her psychiatric residency at Thomas Jefferson University Hospital in Philadelphia. She then completed her Psychosomatic Medicine Fellowship at the University of Chicago. She worked at Northshore University Health Systems for one year prior to returning to join the faculty at the University of Chicago, where she served as Inpatient Attending at Ingalls Hospital and now runs the Women's Mental Health Clinic, the Transplant Clinic, and attends on the Consultation-Liaison Service at the University of Chicago Hospital.

Courses

All Residents

Year long

- Resident Process Group
- C/L Case Conference
- Resident Education Committee
- Journal Club
- Research Mentorship Group

Summer

- Residents as Teachers

Autumn/Winter/Spring

- Clinical Case Conference
- CBT Case Conference*
- Interdisciplinary Case Conference*
- Advanced Psychopharmacology

* monthly conference

	Summer	Autumn	Winter	Spring
PGY 1	Intro to Residency	Psychopathology		
	Residents As Teachers	Clinical Skills		
	Emergency Psychiatry	Psychopharmacology	Intro to Neuroanatomy	C/L Psychiatry
	Psychopathology			Medicine Neurology Psychiatry Integration
	Addictions

Site Locations and Travel Times

Quotes

PGY-1 Dr. Singh *"In such a short time UChicago has come to feel like home. I'm surrounded by individuals that inspire me to nurture my passions while continuing to grow as both a person and a physician everyday!"*

PGY-3 Dr. Mazeres *"It is going to sound standard, even though it's genuine: I would choose this program again without hesitation."*

PGY-3 Dr. Moors *"I am so thankful that I matched at U Chicago, where I feel free to create my own path while supported by a strong scaffold of structured mentoring and passionate faculty."*

My favorite aspect is Process Group, where a group relations psychiatrist facilitates us in better understanding our relationships with power and the institution. It says a lot about a program where our own PD invited and continues to protect this space where residents not only learn more about ourselves, but practice challenging traditional power dynamics confidentially and independently of admin."

Chair Dr. Himelhoch *"The Department of Psychiatry and Neurobehavioral Science is here to support you, your curiosity, and your drive for excellence as you embark on becoming a psychiatrist. We are here to provide context and guidance as you grapple with complex clinical questions, create meaning from difficult conversations, make new personal and scholarly discoveries and build balance, health and wellbeing for yourself, your peers, and the community in which you live."*

Faculty Dr. Yohanna *"Twenty years ago, I came to the University of Chicago after many years elsewhere. I found my clinical, education and research home here among the best colleagues I could ever find. The commitment to our patients, trainees and each other has been extraordinary."*

Faculty Dr. Bean *"My training at the University of Chicago was transformative. I sought a residency that balanced medication management with psychotherapy, and I found it here particularly with the program's emphasis on psychodynamic and psychoanalytic thought. That foundation made me a more well-rounded psychiatrist. After fellowship, I returned because I wanted to be part of the same environment that shaped me, one where residents and faculty take pride in their work and are deeply committed to providing the best care for the South Side."*
